

Conserve Water Notice

02/04/2022

City crews are currently working on a water leak that is causing an abnormal amount of water loss. Until the leak is fixed, we are asking for water conservation from all our users.

This means:

- **Refrain from laundry use and running a dishwasher.**
- **Do Not take long showers.**
- **Do Not keep faucets on more than a slow drip, we realize that no one wants pipes to freeze, this can be accomplished by using only a drip system.**

Once repairs have been made, and we have reached normal levels, we will lift the conservation. Thank you very much for your understanding at this time.

**Director of Utilities
Lance Capehart**
