Jones Field Airport (F00), located at 2615 N. Center St. (TX Hwy 78), is owned and operated by the City of Bonham. Our public airport has a 4,000-foot by 75-foot asphalt runway aligned on 17/35 degrees and features a Terminal Building flight planning room, pilot’s lounge, 100LL AVGAS and an on-site aircraft mechanic.

Bonham honors Jones Field history as a flight-training center for Army pilots during World War II. Constructed between July-September 1941, the first cadets arrived on October 1, 1941. They trained in Fairchild PT-19s, PT-17 Stearmans and P-40 Warhawk aircraft. Over the next few years, more than 5,000 pilots received flight instruction under group commanders Ladd Moore and Harry A. Welter. By the early 1960s, the airport became the site for flight training once again, this time for civilian pilots. More interesting details can be found at the Fannin County Museum of History in Bonham.

Jones Field is a fully operational general aviation airport that caters to industrial, business and recreational users. The airport averages 5,700 general aviation aircraft operations annually, an average of 15 per day, with 47 aircraft based here. On any given day visitors can see various aircraft coming and going, including small planes, private jets, and local crop dusters.

Recently, a 20-year master plan was adopted with a mission to develop landside and airside improvements that will attract pilots, businesses and visitors for many decades to come.

Jones Field Airport - Bonham’s Rising Star
